

YOU'RE INVITED

To discover the latest coming out of the dental industry!

Sponsored By:

Techniques and Trends in Dental Materials A Hands-On Approach

Learn new techniques and tips to optimize the performance of today's adhesives, composites, and cements. Jon Fundingsland will focus his presentation on both clinical and technical results with direct and indirect restorative materials. From a clinical perspective, techniques and tips collected from collaborations with clinicians around the globe will be highlighted.

Key Topics:

- Adhesives
- New Class of Zirconia
- Digital Oral Scanning
- Nanotechnology
- Cements

Speaker: Jon Fundingsland

Date: Thursday, May 31, 2018

Location: Dickerman Dental Prosthetics
76 Pond Street
Sharon, MA 02067

Time: 6:00 pm – Dinner
6:30 pm – Lecture

CE Credits: 3 CEU Credits

Fee: Complimentary, but space is limited. RSVP today.

Jon Fundingsland

After training as a chemical engineer, Jon Fundingsland joined 3M in 1979. During his long career in dental materials, Jon has held positions of increasing responsibilities in various areas that focused on research, product development, and management. His current assignment is as professional relations manager. During his years in research and development, Jon worked in numerous diverse product areas. Most of his experience has been in dental adhesives, resin-modified glass ionomers, and composites.

Jon has been granted nine patents about various aspects of adhesives and was on the development teams for various products. Jon has lectured extensively, in over 30 countries, on the design and efficacy of dental adhesives, composites, and ionomers. Numerous technical presentations and papers are also on record.
